E-R Modeling Version 0 and 1

- ## E-R Model

  - Identify Entity Sets, Relationship Sets, and Attributes by Noun Analysis (and Verb Analysis)
  - Construct ERD Version 0
  - Identify details like PK, Cardinalities, and Participation constraints.
  - Identify distribution of attributes over entity sets
  - Construct ERD Version 1

- ## Documents to be Submitted

- **Noun Analysis Document (.doc file)**

  - Create table for Accepted Nouns having 3 columns: *(Candidate Entity Set, Candidate Attribute, Candidate Relationship Set)*

  - Create another table for Rejected Nouns having 2 columns: *(Rejected Noun, Reason for Rejecting it)*

- **E-R Diagram (.doc file)**

  - Submit snap shots of E-R model *versions 0 and 1*
